* The manufacturer representative is encouraged to complete the above specifications to inform the TSC of measurements claimed, but there is no requirement to do so.

Responsibilities & Instructions - Disc Approval Form

Enclosed are three samples of the above named disc model or variant. I have sent a \$300 check to PDGA Headquarters (IDGC - Wildwood Park, 3828 Dogwood Lane, Appling, GA 30802-3012, ph.#: (706)261-6342, office@pdga.com) for PDGA testing of each new model. Testing fees are assessed at half the rate for manufacturers in the first calendar year they produce discs for PDGA approval. In the case of a disc variant (that is, one with a new name that retains its original name as an element within its new name; for example, the *Ferret*, an approved disc, is changed and renamed the *Ferret Lite*), there is no testing or approval fee.

Please indicate below if disc will have its name translated into another language.

Alternate Name >		Language >
Alternate Name >		Language >

Review of submissions for PDGA approval is typically completed within 15 business days. If there are issues that delay approval, the Technical Standards Committee (TSC) Chair will inform the manufacturer representative of the status of the submission no later than 15 business days after receipt of the test samples. The TSC will email the manufacturer when the disc is approved.

Scan Approved Disc list making sure your proposed disc name is not too similar to a previously approved disc name. PDGA does not referee name conflicts. Please resolve any naming issues with the previously approved manufacturer before your new disc can be approved.

I understand that if the fee is not received by PDGA HQ, that the approval is not finalized. This disc will be legal for all PDGA-sanctioned events once it is approved and the testing fee is paid. If this disc fails to pass all PDGA tests, I understand that a new Disc Approval Form and testing fee will be required when it is resubmitted for testing by the Technical Standards Committee. This Disc Approval Form and three discs are to be mailed to: Jeff Homburg, PDGA Technical Standards Committee Chair, 4502 East 16th Street, Tucson, AZ 85711 - Contact: 520-571-7787 or jhomburg@msn.com
